Check the box that denotes the sex of the individual being monitored.</p> <p>5. Enter the date of birth of the individual being monitored in the format MM/DD/YYYY.</p> <p>6. Enter the North Carolina License number or numbers.</p> <p>9.A. Place an "X" in Record or Estimate. Choose "Record" if the dose data listed represent a final determination of the dose received to the best of the licensee's knowledge. Choose "Estimate" only if the listed dose data are preliminary and will be superseded by a final determination resulting in a subsequent report. An example of such an instance would be dose data based on self-reading dosimeter results and the licensee</p> | CODE | ID TYPE | SSN | U.S. Social Security Number | PPN | Passport Number | CSI | Canadian Social Insurance Number | WPN | Work Permit Number | PADS | PADS Identification Number | OTH | Other | <p>intends to assign the record dose on the basis of TLD results that are not yet available.</p> <p>9.B. Place an "X" in either Routine or PSE. Choose "Routine" if the data represent the results of monitoring for routine exposures. Choose "PSE" if the listed dose data represents the results of monitoring of planned special exposures received during the monitoring period. If more than one PSE was received in a single year, the licensee should sum them and report the total of all PSEs.</p> <p>10.A. Enter the symbol for each radionuclide that resulted in an internal exposure recorded for the individual, using the format "Aa-###a" , for instance Cs-137 or Tc-99m.</p> <p>10.B. Enter the lung clearance class as listed in Appendix B to 10 CFR Part 20.1001 – 2401 (D, W, Y, V, or O for other) for all intakes by inhalation.</p> <p>10.C. Enter the mode of intake. For inhalation, enter "H." For absorption through the skin, enter "B." For oral ingestion, enter "G." For injection, enter "J."</p> <p>10.D. Enter the intake for each radionuclide in μCi.</p> <p>11. Enter the shallow dose equivalent recorded for the skin of the whole body (SDE, WB).</p> <p>14. Enter the shallow dose equivalent recorded for the skin of the extremity receiving the maximum dose (SDE, ME).</p> <p>15. Enter the committed effective dose equivalent (CEDE).</p> <p>16. Enter the committed dose equivalent recorded for the maximally exposed organ.</p> | <p>17. Enter the total effective dose equivalent (TEDE). The TEDE is the sum of items 11 and 15.</p> <p>18. Enter the total organ dose equivalent (TODE) for the maximally exposed organ. The TODE is the sum of items 11 and 16.</p> <p>19. Comments.
In the space provided, enter additional information that might be needed to determine compliance with the limits. An example might be to enter the note that the SDE,ME was a result of exposure from a discrete source of radiation (e.g. emergency response to an incident). Another possibility would be to indicate that an overexposed report has been sent to NRC in reference to the exposure report.</p> <p>20.
